## THE IDEAL WIRELESS VIDEO DOORBELL FOR YOUR PEACE OF MIND

### Communication at your fingertips

Better than a traditional wireless doorbell, the WL-11 uses **DECT technology** to produce the image of your visitor and to allow communication with them through the **portable monitor**.

Standard screen view

## USE DURING CALL

### Comfort and safety

During a **conversation with your visitor**, you can adjust your monitor for extra convenience and security.

You have the **option** to :

- > **Manually record** the image.
- > Alter the **viewing angle** of the door stations camera.
- > Rotate the monitor for **full screen viewing**.

## USE WITHOUT CALL

Your monitor can be used **without calls**.

You can :

- > **check your calls** with the automatic picture memory (up to 3 pictures per call),
- > **access the main menu** to set up your device (battery control, setting the time ...).

## THE IDEAL REPLACEMENT FOR YOUR TRADITIONAL DOORBELL

### Replace your doorbell with the WL-11 wireless video doorbell - it's simple!

- > **Fix the door station on your external wall** in place of your doorbell push and your monitor will automatically connect with it.

**NO WIRING REQUIRED TO USE YOUR SYSTEM AS AN EFFECTIVE SOLUTION TO HELP SECURE YOUR PROPERTY !**

## DECT TECHNOLOGY

The WL-11 wireless video doorbell utilises **DECT (Digital Enhanced Cordless Telephone) technology** which is a digital transmission standard for telephone systems.

- > It offers a **wide range of channels** and high quality sound.
- > It allows better communication distance compared to wifi (DECT typically gives 100m free field whereas wifi gives 35m, on average).
