Engineering data sheet

62K0 Sound system handset

- Elvox sound system call
- Surface wall mounted
- Lock release at calling entrance panel
- Duplex voice operation
- Up to two additional function buttons

General information

This is an economy sound system audio handset.

This handset provides duplex communication with the calling entrance.

The handset is provided with one dedicated button for lock release, A local doorbell input can be used with additional wiring (only in conjunction with 0931 power supply).

Additional accessories are limited to two normal open function buttons.

This handset uses a shared call and audio loud speaker which precludes the use of additional modules.
