

AML5C IP53 Video Doorbell with Chime

AML5C

The Securefast video doorbell is a high-grade IP53 waterproof and dustproof video doorbell which comes complete with a pluggable chime.

The intelligent Wi-Fi configuration allows long distance signal transmission, meaning that the video footage can be viewed anywhere in the world, from any handheld device such as a phone or tablet.

Visitors can also make video calls with the owner of the premises, which can be recorded for a short period of time. Wi-Fi connection to the video doorbell enables it to connect multiple users and allow live online viewing at the same time.

The unit has six months battery life, therefore there is no need for hard-wiring, however if you would like the secure knowledge that your video door bell is always working you can connect the unit to a 12-24V AC power source.

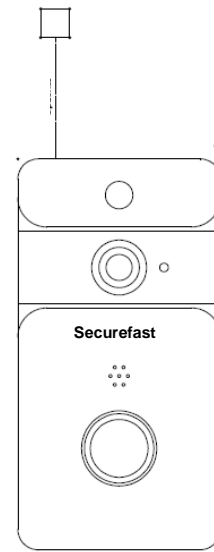

Features & Benefits

- High grade IP53 waterproof and dustproof
- Advanced high speed video processor chip
- Long distance signal transmission, support mobile phone real time monitoring
- High definition video and two way voice call makes communication clearer
