

Introducing the new...

CBB Keypad

CDVI Group Products

Range: Digicode

The original just got better

In response to customers requests, the popular CBB keypad from CDVI has been re-developed to provide easier installation, programming and use.

Its heavy duty stainless steel construction, and its high resistance to vandalism, makes the new CBB suitable to secure external sites and parking areas in addition to industrial, commercial, retail and residential applications.

Braille keys assist the partially sighted, the option to allow users to change their own codes and 3 relays as standard increase the flexibility of the product.

...at a glance, what's new

- 4, 5 or 6 digit code length
- No DIP switches
- Free voltage
- Audible feedback
- Master reset feature
- Users own code change

Technical specifications

Dimensions:	120 x 100 x 65mm
