

ED5

Intercom Handset with functional buttons and LED indicators

Overview

The ED5 Handset allows an occupant of a dwelling to answer a call from a visitor at a communal entrance and have a two-way simultaneous conversation. They can then enable the remote operation of the electric locking device to permit the visitor access.

The ED5 is constructed from hard wearing HIPS plastic in a sleek and modern design. HIPS has good mechanical properties; impact resistance and toughness. The handset is a 'surface mount' design for easy installation.

The ED5 is compatible with APEX, Elite and legacy DC systems.

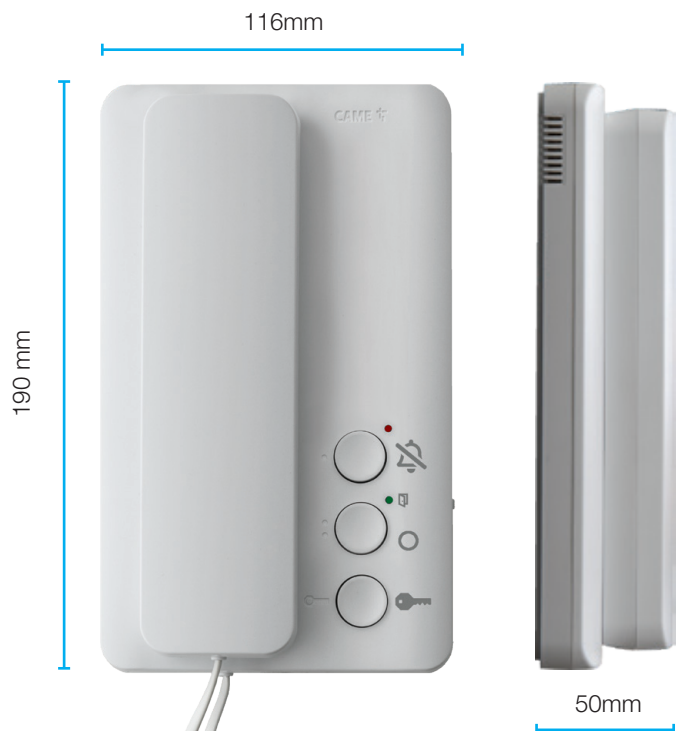

- Handset with cradle switch hangup
- Door Status LED
- Privacy Status LED
- External call tone adjustment via slider switch
